

The Principals of ALSC Architects are pleased to announce three new Associates to continue our legacy of excellence.

Robin Pecka NCIDQ

Robin Pecka is an accomplished interior designer with an ability to understand and translate client needs into beautiful and inspiring spaces. A career in interior design allows Robin to pursue her passion for making a positive impact in people's lives. Robin has been with ALSC Architects her entire professional career. She earned her Bachelor of Arts and Master of Arts in Interior Design from Washington State University and is NCIDQ Certified.

FEATURED PROJECTS

- > Science & Technology Building, Walla Walla Community College
- > Ste. Michelle WSU Wine Estates, Washington State University Tri-Cities
- > Meyer Health & Sciences Building, North Idaho College
- > Highland Middle School, Mead School District
- > Northwood Middle School, Mead School District

Jodi Kittel AIA, LEED AP

Jodi Kittel is a versatile architect responsible for overseeing all phases of a project, from design through completion of construction. Architecture was a perfect choice for her as a profession since it is a fusion of math and art; both of which she loved in school. Jodi graduated from Washington State University, earning a Bachelor of Architecture and Bachelor of Science in Architectural Studies. She is a licensed architect in the State of Washington.

FEATURED PROJECTS

- > Creekside Elementary School, Mead School District
- > Elementary School #10, Mead School District
- > Franklin Elementary School, Spokane Public Schools
- > Amistad Elementary School, Kennewick School District
- > Facilities Services Building, Kennewick School District

Connor Nicholas

Connor Nicholas is a gifted designer whose expertise in design, visualization, and collaboration allows clients to experience how a building feels and looks throughout the design process. A digital artist who brings buildings to life through 3D modeling and state-of-the-art graphics, his ability to listen and design in real time results in dynamic architecture that directly reflects the user's vision and goals. Connor earned his Master of Architecture from the Savannah College of Art and Design.

FEATURED PROJECTS
